**SPA ETIQUETTE**

The following tips will help you enjoy your spa visit:

**New clients:** Please arrive 15 minutes prior to appointment time.

**Cell Phones:** To provide a tranquil and stress-reducing experience for all clients, we ask that your cell phone be turned off before entering the salon.

**Attire:** Casual - something that can easily be slipped off. For massage services, feel free to disrobe to your comfort level. The massage therapist will ensure that you are always properly covered by a sheet or towel.

**Communicating your preferences:** All aspects of treatment can usually be modified to your taste, from the amount of light, volume of music, whether or not you choose to have a conversation or enjoy the treatment in silence. If you want the therapist to go deeper or be gentler, let him or her know. Also, feel free to ask questions. We appreciate knowing your thoughts and clarifying any issues you may have.

**Shaving:** If you must shave, do so at least two hours before your scheduled appointment; particularly if you are a man receiving a facial or a woman receiving any kind of scheduled body treatments.

**Gratuities:** Though not included in the price of the service are gladly accepted. 15-20% is customary for each person who gave you a service, but at your discretion, you may leave more or less depending on the quality of service. For your convenience, tipping envelopes are provided at the front desk.

### Soli-Tone Photo-Energy System

---

**Oakmont Skin Care & Electrolysis** is pleased to offer the latest in skin rejuvenation care, by using the advanced technology system, Soli-Tone. This device uses light therapy and special currents to turn back the clock on aging, sun-damaged skin, minor acne, redness and uneven pigmentation. This multi-platform system features two distinct facial treatments: the **LumiLift®** and the **LumiFacial®**. Simultaneous application of these technologies mutually enhances their individual effectiveness, promoting cellular rejuvenation from within. Results are immediate and visible. Improvements continue for at least three months after a single session!

## **Soli-Tone Photo-Energy System (cont.)**

---

### **LumiFacial® ~ \$120.00**

*The LumiFacial® targets common skin problems, such as minor acne, redness, and uneven pigmentation. During the treatment, a wrap-around facial panel is positioned in front of your face. The Soli-Tone selects the specific Light energy required for your skin type and condition. The light used is from the visible spectrum, similar to sunlight but without the harmful UV rays. The treatment is completed after only 30 minutes. You can immediately return to your normal routine with no redness or peeling.*

### **LumiLift® ~ \$140.00**

*The LumiLift® procedure is a revolutionary way of rejuvenating the skin and lifting sagging muscles. It is performed with two special electrodes that feature an advanced application of Micronized current and Light energy. During the LumiLift® treatment, a pulsating light is directed at the skin surface. Light passes through the layers of the skin and penetrates into the dermis. This powerful light stimulates the fibroblast cell to produce more collagen. The increased production of collagen smoothes and softens the appearance of wrinkles, reduces the size of pores, and improves skin texture. At the same time, the electrodes emit Micronized currents to tone and lift sagging muscles.*

### **LumiLift® & LumiFacial® ~ \$160.00**

*For optimum improvements which can be quite dramatic, combine both the LumiLift® & LumiFacial® in one treatment! Most clients see immediate improvement. With a series of treatments, years are easily removed from the appearance of the skin. You will see younger-looking skin, reduction in fine lines and wrinkles, increased skin elasticity and redefined and firmer facial contour. Pore size is improved along with textural irregularities, acne, and pigmentation caused by blemishes. This is achieved with no thermal damage to the skin and no down time.*

## Individual Eyelash Extensions ~ \$150.00

Eyelash Extensions are an exciting new product and technique for thicker, longer, and naturally abundant looking eyelashes. Eyelashes are made thicker and longer through professional application of an individual synthetic eyelash extension directly attached to the natural eyelash with a specially formulated bonding agent. These semi-permanent eyelash extensions can last up to 4-6 weeks depending on the life cycle of your own natural eyelashes and other factors your esthetician will review with you at your first eyelash extension consultation/appointment. Though the average cycle of a single lash is about 90-120 days, factors such as your eyelash characteristics, lifestyle and general care of your eyelashes will affect how long your lash extensions will last. You will need to refrain from getting your eyelash extensions wet for the first 24-48 hours after your application to allow your lash extensions to "set" completely. You will also be provided with after care instructions, so you will know exactly how to care for your new Eyelash Extensions.

---

## Duralash Naturals Eyelash Extensions ~ starting at \$25.00

Now, you don't have to rely on Mother Nature for beautiful, full lashes. Ardell's semi-permanent eyelash extensions create a natural looking lash with more flexibility and creativity than a "strip lash" may allow. As close to natural as they come, DuraLash individual lashes are virtually weightless, permanently curled, waterproof, comfortable and will stay on for three to four days!

Plus, aloe and other nourishing ingredients in the perming products prevent lashes from becoming dry or brittle, keeping them luxuriant for weeks.

Ear candling is an ancient technique that has been around for thousands of years. This truly amazing technique utilizes a hollow candle coated with wax. The instructions are simple. One end of the ear candle is placed snugly into the ear, and the other end is the one you light. The lighting of the candle creates a gentle vacuum that can soften and dislodge wax and debris and pull it into the ear candle. Ear candling stands in a class of its own, when it comes to natural healing.
